Message: Hello Mayor Buckhorn,

In February of this year 2015 I sent correspondence through this website to your office concerning water fluoridation. In the email I included links and documentation illustrating the concerns surrounding the addition of Sodium Fluoride into municipal water supplies and the impending lawsuits for damages that are inevitable because of mass "medication" of large populations of people with Sodium Fluoride and Hydrofluosilicic Acid provided by The Mosaic Company.

I understand that the issue was forwarded to an your executive aid, M Miles (Executive Aide, Public Works and Utility Services) and that he must have concluded that no further action was warranted with this issue. Many people, including myself, would respectfully differ in this conclusion. I would further assert that the city's inaction on this matter suggests complicity in the wholesale mass medication and, some would say, poisoning of the population of Tampa and the efforts of The Mosaic Company's export of the materials to be used for the same purpose for municipalities all over the country. I'm curious what your personal position is on such a view.

Thank you for your time,

Randy McMillan

A very concerned citizen
