Message: Hello Mayor,

I was hoping you understand the issues surrounding fluoridated water.

ARTICLES:

<http://www.hsph.harvard.edu/news/features/fluoride-childrens-health-grandjean-choi/>

<http://www.telegraph.co.uk/news/science/science-news/11430087/Fluoride-in-drinking-water-may-trigger-depression-and-weight-gain-warn-scientists.html>

We know one of a local Tampa company provides Hydrofluosilicic Acid to many municipalities in the United States. I would urge you to research this issue much closer.

Per Mosaic's own published MSDS on Hydrofluosilicic Acid (fluoride):

[http://www.mosaicco.com/images/Hydrofluosilicic\\_Acid\\_05\\_11.pdf](http://www.mosaicco.com/images/Hydrofluosilicic_Acid_05_11.pdf)

Hydrofluosilicic Acid is an INDUSTRIAL WASTE PRODUCT, CARCINOGEN and OBVIOUS HEALTH

HAZARD. The addition of this substance into municipal water supplies is unethical and could possibly lead to damages by large segments of the public. I will attempted to attach the articles mentioned in this email so to add them to Tampa's public record.

Thank you for your time,

Randy McMillan
